Medium.com

Senior Mobile Engineer with 8+ years of experience building scalable, high-performance applications across React Native, React, iOS, and Android. Strong expertise in mobile architecture, reusable component systems, CI/CD automation, performance optimization, and production stability. Experienced in leading technical initiatives, mentoring engineers, and building AI-assisted developer workflows that improve engineering productivity and code quality.

EXPERIENCE

Dbiz Solutions, Bengaluru — Aug 2025 - Present
Senior Analyst - Mobile

- Owned and delivered a core React Native mobile module end-to-end, driving mobile architecture discussions, mentoring engineers, and improving onboarding efficiency and code quality.
- Architected reusable UI and utility component systems with centralized theming, reducing duplicate code by ~40% across 20+ components.
- Designed and implemented CI/CD automation workflows (Azure DevOps), reducing PR review time by ~60% and enforcing consistent code quality standards.
- Built an AI-powered (LLM-based) PR review system with automated comment resolution, streamlining code reviews and minimizing manual effort.
- Implemented pre-commit automation and code hygiene checks (formatting, linting, hardcoded value detection, i18n validation), ensuring consistent development practices.
- Led two major React Native upgrades: v0.73 → v0.78 and v0.78 → v0.86, managing dependency and native-module compatibility, breaking changes, build stabilization, and migration validation across iOS and Android.
- Delivered deep linking (including deferred), supported multi-environment deployments.
- Collaborated with client and cross-functional teams through technical discussions, demonstrations, feedback cycles, and production releases.

Integrate, Chennai — Aug 2023 - Aug 2025
Software Engineer - L2

- Took technical ownership of key mobile modules, driving architecture discussions, implementation decisions, and feature delivery.
- Performed Technical Lead responsibilities, providing technical guidance, mentoring developers, conducting code reviews, and promoting engineering best practices.
- Engineered modular, reusable React Native components, increasing code reusability by ~60%.
- Optimized application performance and reduced technical debt across multiple releases.
- Developed and maintained React web components and features, contributing to shared frontend architecture and reusable UI patterns.

CORE EXPERTISE

- Cross-Platform Mobile Development — React Native, React, Flutter, iOS, Android
- Mobile Architecture, Scalable Design & Reusable Component Systems
- Clean Architecture, MVVM & SOLID Principles
- Server-Driven UI
- Technical Leadership & Engineering Mentorship
- AI-assisted Engineering & Developer Productivity
- Production Support, Incident Management
- CI/CD Automation, DevOps Workflows & Release Management

TECHNICAL SKILLS

Languages & Frameworks:
JavaScript, TypeScript, React, React Native, Flutter, Swift, Objective-C

React Native & New Architecture:
React Native, React Navigation, Reanimated, Fabric, JSI, TurboModules, Native Modules, Expo, Native iOS Development, Android, Deep Linking, Deferred Deep Linking, Server-Driven UI

Architecture & Design:
Clean Architecture, MVVM, SOLID Principles, Design Patterns, Component-Based Architecture, Modular Design, Scalable UI Architecture

State & Data:
Redux, SQLite, REST APIs

Cloud & Serverless:
AWS Serverless, AWS Lambda, Amazon S3, Amazon API Gateway

- Improved unit testing with Jest and code quality with SonarQube, helping reduce production regressions.
- Worked with Redux Toolkit, React Navigation, Reanimated, and modern React Native development patterns to build scalable and performant mobile experiences.

Fibonalabs, Bengaluru Apr 2020 - Aug 2023
Software Development Engineer 2

- Built scalable UI components using React Native and reusable design patterns, ensuring consistent cross-platform performance.
- Led a team of 8 engineers, mentoring junior developers, providing technical guidance, conducting code reviews, and supporting end-to-end product delivery.
- Developed an AWS Serverless proof of concept using AWS Lambda, Amazon S3, and API Gateway for a client pitch. Demonstrated the solution successfully and contributed to taking the concept into project development.
- Contributed to React Native architecture decisions, reusable component design, application performance, and maintainability.
- Mentored junior engineers and enforced best practices through code reviews.
- Contributed to an existing Flutter application, delivering feature enhancements, UI implementations, and ongoing maintenance.

DesmosLab Private Limited, Coimbatore May 2018 - Mar 2020
Software Developer

- Developed and launched the first iOS application using MVC architecture for an e-commerce client, ensuring a robust and maintainable solution.
- Led the migration of a legacy application to Flutter, improving performance and reducing development overhead.
- Explored React Native and Flutter, gaining early hands-on experience in cross-platform mobile development.
- Contributed to UI implementation and API integration, ensuring smooth user experience and reliable backend communication.

EDUCATION

Bachelor of Engineering 2014 – 2018
Sri Ramakrishna Engineering College, Coimbatore

Integrations
Payment Gateway Integration, REST APIs, Deep Linking, Deferred Deep Linking, Third-Party SDK Integration

Testing & Code Quality
Jest, Unit Testing, Test-Driven Development (TDD), SonarQube, Code Reviews, Static Analysis, Code Quality Automation

DevOps & Monitoring
Azure DevOps, CI/CD Pipelines, Git, Datadog, Release Automation, Multi-Environment Deployments

AI & Automation
LLM-Based Developer Tooling, AI-Assisted Code Review and Analysis, Agentic AI, AI Agents and Automation, Prompt-Driven Workflows, Ollama, Developer Productivity Automation

Development Practices
Agile/Scrum, Technical Documentation, Production Support, Incident Management, Performance Optimization

Design Tools
Figma, Adobe XD

APPLIED AI & GENAI

- Built an LLM-based PR review workflow with automated comment resolution.
- Experimented with local LLMs using Ollama and Qwen2.5-Coder 14B for local coding assistance.
- Applied AI-assisted workflows alongside pre-commit checks and CI/CD automation to improve code quality and reduce repetitive tasks.
- Explored agentic AI, workflow orchestration, and LLM-powered automation for software development.
